YTD Video Downloader lets you capture online video from several sources, and convert them to a half dozen formats. The software also offers basic video editing and a simple integrated video player. Versatile video downloader YTD Video Downloader is capable of scraping video files for direct download off of numerous media platforms. The official website includes the full list of compatible video sites. However, several of the sites listed are no longer online. In addition, many of the sites listed require the Pro version of the app. This includes some of the most popular video platforms, such as YouTube. That severely limits the functionality of the free version. Simple UI Visually, the software is uncomplicated. You won't find any fancy bells and whistles here. It's a robust interface, organised in intuitive tabs with powerful options and clear labels. You won't have any trouble finding what you're looking for. That said, the app isn't very effective when it comes to identifying Free and Pro features. Unavailable features aren't greyed out or otherwise separated, which can be tedious at first. The free version is supported by ads, which can be somewhat intrusive to user experience. Video conversion & edition Both the free and pro versions of YTD are capable of video conversion and basic editing. The 'Convert' tab accepts any sort of video files. You can choose from a range of target video formats. These include AVI, MP4, Apple Quicktime MOV, WMV, PSP Video, and several others. Limited usability YTD Video Downloader is an adequate tool for capturing video files on the web. However, the free version of the software has very limited usability. Only a handful of the listed sites are both currently live and available without the Pro version. These include the likes of Vimeo and Facebook, but not YouTube. The latter is exclusively available to Pro users. We don't have any change log information yet for version 5.9.18.6 of YTD Video Downloader. Sometimes publishers take a little while to make this information available, so please check back in a few days to see if it has been updated. Can you help? If you have any changelog info you can share with us, we'd love to hear from you! Head over to our Contact page and let us know.
